

Medical Center Enterprise Brings Quality Care to the Wiregrass Community

Residents of Enterprise, Ft. Rucker, Coffee County and surrounding areas have easy access to Medical Center Enterprise, a progressive, acute-care hospital offering a full range of health services to the community. “Continuing to build on our 106-year tradition of caring for the healthcare needs of Wiregrass communities, the employees and medical staff at Medical Center Enterprise work hard every day to provide care that not only meets, but exceeds, patients’ expectations for their hospital experience,” said Jeff Brannon, chief executive officer.

Patient-focused care

As part of their goal to exceed their patients’ expectations of care, the hospital remains focused on hourly rounding – checking on every patient, every hour, to take care of their needs. Additionally, patients are called after they leave the Emergency Department to make sure they understand discharge instructions and to ask if they have comments about the care they received.

A wellness-based community resource

Medical Center Enterprise also serves as a community resource for health education. A wealth of health

education resources is available for the community and clinical professionals, with childbirth, diabetes and wound care education classes as a few examples. The Senior Circle chapter and Healthy Woman program support healthy and active lifestyles and good healthcare decision making. More information on these programs and hundreds of health-related topics can be found at the Health Resources link at www.MCEHospital.com.

As one of the largest employers in Coffee County, their more than 400 employees and medical staff are some of the community’s most active volunteers and leaders. Through hospital services, health fairs, education seminars and community support activities, thousands of Wiregrass residents are helped every year, making a measurable impact on the quality of life for the people who live and work in the Wiregrass area.

Medical Center Enterprise continues to enhance services to meet the needs of a thriving community.
